

NITEGRIP®

TRADE SERIES

MODEL NO. 6001

FEATURES KEYS & BENEFITS

Nitrile-Dipped Palm: Synthetic latex material protects from latex allergies, and provides tactile dexterity.

Thin Design: Ensures maximum breath-ability for comfort, and dexterity.

Form-Fitting Construction and Elasticized Cuff: Ensures a snug fit while the gloves are in use.

Seamless Construction: Adds durability and longevity.

Non-Coated Back: ensures gloves are breathable and comfortable.

Whether you're looking for economic hand protection or gloves with excellent tactile sensitivity, Nitrile-dipped gloves offer both without sacrificing durability.

The NiteGrip® is a dipped glove that features a Nitrile-dipped palm for maximum tactile dexterity and grip control, while removing the risk for latex allergies. The seamless construction and resistance to tears and punctures adds durability and protection, while the non-coated back ensures these gloves are breathable and comfortable.
